

Scalefusion helped Technomedicare in improving employee productivity and reducing operational costs.

About the Company

Technomedicare was founded in 2017 by Prof.Dr.Orhan, an Emergency Medicine Specialist. Within a short period of time, it gained attention with its emergency medicine device and software projects. The company produces devices and software projects under Gazi Technopark's umbrella and also provides training and consultancy services.

Business Goals

Technomedicare is known for its technological advances that shape the future of emergency patient care, including virtual reality, artificial intelligence, augmented reality, and telehealth services. Through their projects, they seek to overcome the challenges faced in clinical practice by technological developments. They work with leading companies in the field of technology in the world. They aim to deliver uninterrupted medical services to their clients by ensuring optimum health and proper management of their medical devices.

Challenges

Technomedicare was looking for a kiosk solution that could give them a 360-degree view of the devices and endpoints. They were also facing problems in managing their device fleet remotely. They struggled to implement over-the-air content and updates, which was one of their most critical requirements. Furthermore, establishing proper team communication on digital devices presented another obstacle that prompted them to search for an MDM solution.

Industry

Healthcare

Solutions & Features

- Content Management
- Remote Troubleshooting
- Team Communication
- Kiosk Lockdown

Key Benefits

- Increased device and data security
- Increased operational efficiency
- Increased device and data security
- Heightened employee productivity

Why Scalefusion

- Industry-leading UEM provider with simplified and intuitive mobile device management experience
- Easy to configure, deploy, and upgrade devices and apps across the entire lifecycle
- Leading choice for a scalable solution with multi-OS support

Solution

Technomedicare trusted Scalefusion to solve their challenges and it was just the right fit for them. They achieve end-to-end control of their remote devices and were able to push important updates as well as over-the-air content with the Remote Control and Content Management features. Scalefusion's Kiosk Lockdown feature helped them to make the devices mission-centric, while having a clear view of their entire device fleet on the dashboard. Furthermore, the team could connect and collaborate seamlessly with each other with the Team Communication Suite.

The support team at Technomedicare was successful in providing any remote assistance using Scalefusion Remote Cast and Control. This helped in reducing the device downtime, saving on critical IT resources while the devices were out on the field.

Technomedicare was able to utilize the powerful features of Scalefusion MDM with absolutely no setup cost involved. All these synchronized just right to establish secure device management for the company.

Key Results

Working with Scalefusion has brought out the following proven results for Technomedicare:

- Secure device management
- Smooth team communication and collaboration
- Efficient management of remotely operating devices

Testimonial

“The biggest struggle for us was to remotely control and manage the devices. With Scalefusion, we were able to establish secure remote management for our entire device fleet.”
- Hasan Basri, Computer Engineer, Technomedicare.

About Scalefusion

Ambitious companies around the world trust Scalefusion to secure and manage endpoints including smartphones, tablets, laptops, rugged devices, POS and digital signages. Our mission is to make Device Management simple and effortless along with providing world class customer support.
